The tax season is fast approaching. US is a county with high income and high tax. The tax planning is very important to the family and business financial strategy. There are some tax advantages provided by government such as tax relief, exemption and credit, and they are different depending on the people with different income levels, also are with time limit. The underline tax issues should not be ignored. The tax law is one of the most complicated laws, it is even more difficult for a lot of immigrants. The seminar will focus on the following:

- \* New Tax Law and the impact to your family and business;
- \* Tax benefit for small business;
- \* The tax consideration in Retirement planning; and
- \* Financial planning and strategy

The invited presenter is a senior certified financial specialist who has had many years of experience with more than hundreds of clients, including individual families, small business, and corporate companies. She has given the seminars many times and were very well received by the broad audience. The presentation will benefit you, your family or your company in many ways now and in the future. We have also invited an experienced CPA who will be there to answer some tax related questions you may have. So, don't miss this opportunity.
